MEMBER WEBINAR

WEDNESDAY 9 DECEMBER 2026

Cyber Security for GP Practices

What Recent Breaches and Compliance Changes Mean for You

Health data is one of the most targeted types of data, and recent breaches in New Zealand have put practices' security obligations under a spotlight. This session covers what practice owners and managers need to know now.

WHEN
Wed 9 December 6pm to 7pm

WHERE
Online via Microsoft Teams

FOR
Practice owners and managers

COST
Free for GenPro members

What we'll cover

- ✓ How the Health Information Security Framework (HISF) and the updated Privacy Act requirements apply to your practice
- ✓ What Health NZ is changing, and what it means for practices and their suppliers
- ✓ What regulators in Australia and Europe are doing, and where that suggests New Zealand is heading
- ✓ Lessons from recent health sector breaches
- ✓ Practical first steps, whatever your practice's current level of maturity

You'll take away

A short HISF readiness checklist, plus a template for reviewing the suppliers that handle your patient data.

Presented by Luke Thomas, Cysura

Cysura builds Pono, a HISF compliance tool GenPro offers to members. Luke will keep the session to education, not sales, and Pono will appear only as a worked example of tracking your obligations.

Register now

Scan the code, or **register on Microsoft Teams**

Can't make it? The session will be recorded and shared with members after the event, along with the checklist and template. Questions: Carole Unkovich, carole@genpro.org.nz
